**SPECIFICATION** 

For

SWITCHING POWER SUPPLY

M/N: MPM-G205(-SB)(-C)

| Revision H | istory        |   |  |  |  |
|------------|---------------|---|--|--|--|
| Version    | Revise Date   | Change Items  |  |  |  |
| Rev. 01    | Mar. 13. 2012 | Established.  |  |  |  |
| Rev. 02    | Sep. 20. 2012 | Revised peak load specification.  |  |  |  |
| Rev. 03    | Oct. 5. 2012  | Added performance curves.   |  |  |  |
| Rev. 04    | Jun. 21. 2013 | Updated safety approvals status.  |  |  |  |
| Rev. 05    | Jun. 23. 2014 | Change description table and photo.   |  |  |  |
| Rev. 06    | Sep. 10. 2014 | <ol> <li>Add mechanical drawing with cover.</li> <li>Add derating curve with cover.</li> <li>Add UL approved.</li> </ol>  |  |  |  |
| Rev. 07    | May. 21. 2015 | Changed the initial setting accuracy of +5Vsb from ±2% to ±2.5 %.   |  |  |  |
| Rev. 08    | Nov. 25. 2015 | <ol> <li>Added "or equivalent" after "Molex" and "European".</li> <li>Changed Molex Proposed Terminals from 5176 to 5167.</li> <li>Added vibration test.</li> </ol> |  |  |  |
| Rev. 09    | Jan. 23. 2017 | <ol> <li>Added "Designed to meet IEC 60601-1-2 4th ed. EMC".</li> <li>Changed IEC 61000-4-11 Voltage interruptions &gt;95%, 250 cycles to C.</li> </ol>             |  |  |  |
| Rev. 10    | Feb. 6. 2018  | Changed form.   |  |  |  |
| Rev. 11    | Mar. 9. 2018  | 1.Added Designed to meet IEC 60601-1-2 4th ed. EMC.     2.Changed EMC and Safety Approvals.   |  |  |  |
| Rev. 12    | Jul. 3. 2018  | Changed mechanical diagram.   |  |  |  |
| Rev. 13    | Nov. 6. 2018  | 1.Changed EMC: Immunity ESD to ±15KV air discharge, ±8KV contact discharge.      2.Changed EMC: Immunity Power Magnetic to 30A/m.                                   |  |  |  |
| Rev. 14    | Nov. 19. 2019 | Changed Safety Approvals to 3.1 Edition.  |  |  |  |
| Rev. 15    | May. 27. 2022 | Changed "IP or OP to Ground" to 1800VAC.  |  |  |  |

#### 200W Medical AC / DC

**FEATURES** 

- ✓ 200W forced air cooling, rated 120W and peak 200W convection cooled medical power supply.
- ✓ Industry standard 3" x 5" foot print.
- ✓ Active Power Factor Correction meets Class D.
- ✓ Adjustable output range.
- Class II construction for Home Healthcare Environmental applications.
- ✓ Also class I with optional functional ground connected.
- ✓ No-load power consumption < 0.5W (Green power design).
- Meet medical standard IEC 60601-1, EN 60601-1, UL 60601-1 type BF rated patient contact leakage current.
- ✓ Designed to meet IEC 60601-1-2 4th ed. EMC.
- ✓ Meet EMI CISPR/FCC class B.
- ✓ Optional +5Vsb & Remote on/off function.
- ✓ Optional cover kit with suffix –C order no.

#### **Models & Ratings**

RoHS

| Model Number | Wattage<br>(Rated / Max) | Output Voltage |             | Min. Current | Rated<br>Current | Max. Current |
|--------------|--------------------------|----------------|-------------|--------------|------------------|--------------|
| MPM-G205     | 120 W / 200 W            | V1             | +20 V - 24V | 0 A          | 6 A – 5 A        | 8.4 A        |
| MPM-G205-SB  | 120 W / 200 W            | V1             | +20 V - 24V | 0 A          | 6 A – 5 A        | 8.4 A        |
| MPWI-G205-SB | 120 W / 200 W            | V2             | +5 Vsb      | 0 A          | 0.1 A            | 0.1 A        |

Total Output Power: Max. 200W with 11.7 CFM force air cooling; rated 120W (peak 200W for 5 sec (Note 1)) convection cooled at 50°C environment temperature. (Note 2) Note: 1. Peak load with convection cooled up to 200W keeps 5 seconds, please see the detail directions in below.

To boosting the output power, It shall be met the following conditions at the same time.

\* The peak load shall not over the specified value.

F direct patient

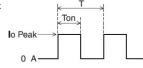

ne time.

lo: Rated output current lo Peak: Peak output current

T: Duty cycle

(3)

Ton: Duration of peak load.

 $lo^2 \ge (lo Peak)^2 \times (Ton/T)$ 

3. MAX output current can be sustained if the total power doesn't exceed 200W.

M P M - G 2 0 5 -  $\frac{Y}{1}$  -  $\frac{aaa}{2}$  -  $\frac{Z}{3}$ 

\* The max. ambient temp. ≤ 50°C.

\* The duration of peak load shall less than 5 seconds.

\* The duty cycle shall been met the following formula.

2. For more detail information of performance, please see Derating Curve.

|                     | Y =   | Output number        |
|---------------------|-------|----------------------|

## 200W Medical AC / DC

| Input                     |               |  |   |            |   |  |  |
|---------------------------|---------------|--|---|------------|---|--|--|
| Characteristic            | Minimum       | Typical  | Maximum   | Units      | Notes & Conditions  |  |  |
| Input Voltage             | 90            | 115 / 230  | 264   | VAC        | Continuous input range.   |  |  |
| Input Frequency           | 47            | 50 / 60  | 63  | Hz         | AC input.   |  |  |
| Input Current             |               |  | 2.5   | А          | Nominal AC Input Voltage (115VAC/230VAC), rated load.                   |  |  |
| Inrush Current            |               |  | 30 / 60   | А          | Nominal AC Input Voltage (115VAC/230VAC), one cycle at 25°C.            |  |  |
| Laska as Osmani           | 100 / 300     | ^  | Primary to Secondary<br>Normal Condition / Single Fault Condition |            |   |  |  |
| Leakage Current           |               | 100 / 300  |   | <b>μ Α</b> | Primary to Earth GND (Note 1) Normal Condition / Single Fault Condition |  |  |
| No-load power consumption |               |  | < 0.5   | W          | Nominal AC Input Voltage (115VAC/230VAC).                               |  |  |
| Power Factor              | 0.9           |  |   |            | AC Input Voltage 230 VAC, rated load.                                   |  |  |
| Input Protection          | Dual non-user | Dual non-user serviceable internally located AC input line fuse. Fuse: 3.15A / 250VAC * 2pcs |   |            |   |  |  |

Note:

<sup>1.</sup> Only exists when earth ground is connected.

| Output                         |               |  |                     |       |   |  |
|--------------------------------|---------------|--|---------------------|-------|---|--|
| Characteristic                 | Minimum       | Typical  | Maximum             | Units | Notes & Conditions  |  |
| Output Voltage                 |               | +20 V - 24V  |                     | DC    |   |  |
|                                |               | +5Vsb  |                     | DC    |   |  |
| Output Current                 |               | 6 – 5 <sup>(V1)</sup>  | 8.4 <sup>(V1)</sup> | Α     |   |  |
| Output Current                 |               | 0.1 <sup>(V2)</sup>  | 0.1 <sup>(V2)</sup> | _ ^   |   |  |
| Initial Set Accuracy           |               | ±1 <sup>(V1)</sup><br>±2.5 <sup>(V2)</sup>   |                     | %     | Initial Setting Accuracy is at Input 115VAC and all output at 60% rated load.   |  |
| Minimum Load                   |               | 0  |                     | Α     |   |  |
| Start Up Delay                 |               | 1.0  |                     | Sec   | Time required for initial output voltage stabilization, at 230VAC Input, rated load.  |  |
| Hold Up Time                   | 25            |  |                     | mS    | Nominal AC Input Voltage (115VAC), rated load.  |  |
| Line Regulation                |               | ±1.0 <sup>(V1)</sup><br>±1.0 <sup>(V2)</sup>   |                     | %     | Less than ±1% at rated load with ±10% changing in input voltage.  |  |
| Load Regulation                |               | ±1.0 <sup>(V1)</sup><br>±2.0 <sup>(V2)</sup>   |                     | %     | Measured from 60% to 100% rated load and from 60% to 20% rated load (60% ±40% rated load).  |  |
| Ripple & Noise                 |               | 200 - 240 <sup>(V1)</sup><br>100 <sup>(V2)</sup>   |                     | mV    | Measured at rated road by a 20MHz bandwidth limited oscilloscope and the each output is connected with a 10μF Electrolytic Capacitor and a 0.1μF Ceramic Capacitor. |  |
| Overvoltage Protection         |               | For some reason the power supply fails to control itself, the build-in over voltage protection circuit will shut down the outputs to prevent damaging external circuits. |                     |       |   |  |
| Over Temperature<br>Protection |               | When the power supply operating over the temperature or over load limit, the power supply will be shut down automatically to protect itself.                             |                     |       |   |  |
| Short Circuit Protection       | Fully protect | Fully protected against output overload and short circuit. Automatic recovery upon of overload condition.  |                     |       |   |  |
| Remote on/off (optional)       |               | The power supply will be turned on when the power On/Off pin is connected to secondary GND. This function exists only with optional +5Vsb, model no. suffix "-SB".       |                     |       |   |  |

| 1                      |                | С        | INT: >95%, 250 cycles                       |

#### Note:

- 1. As a build-in type power supply, the power supply needs to be installed in a suitable enclosure to pass the EMI/EMC tests. The final assembly has to comply with the valid EMI/EMC and safety.
- 2. The mounting holes should be connected to each other to conform the EMI limit.
- 3. Apply to output equal or below 120W. For higher output power, please re-confirm with MAGIC POWER.
- 4. The test result of input 240Vac / 100Vac is criteria A / B.

#### **Safety Approvals**

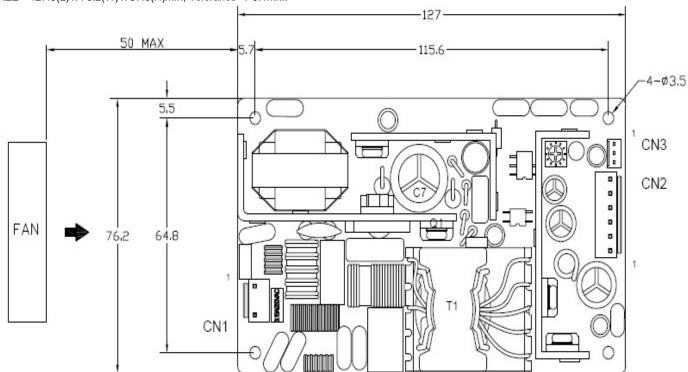

| Safety Agency | Safety Standard  | Notes & Conditions |  |
|---------------|--|--------------------|--|
| TUV           | EN 60601-1:2006 + A11: 2011 + A1: 2013 + A12: 2014, 3.1 Edition Designed to meet.    |                    |  |
| СВ            | IEC 60601-1:2005 + A1:2012, 3.1 Edition  | Approved.          |  |
| UL/cUL        | ANSI/AAMI ES60601-1:2005/(R)2012 + A1:2012, 3.1 Ed. CAN/CSA-C22.2 No. 60601-1 (2008) | Approved.          |  |

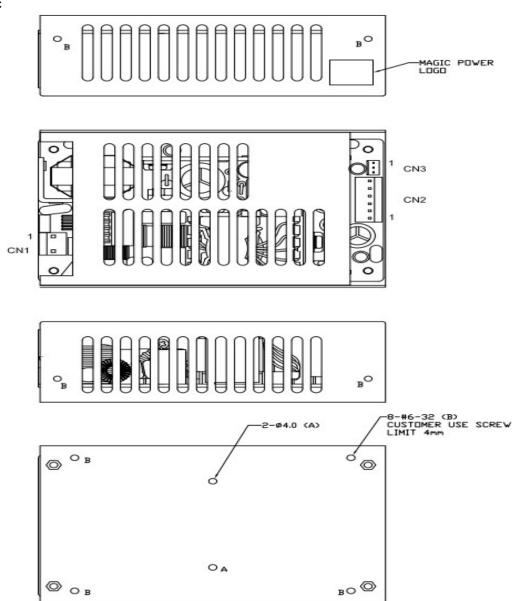

#### **Mechanical Details**

MPM-G205(-SB)

SIZE: 127.0(L) x 76.2(W) x 37.8(H)mm, Tolerance +/-0.4mm.

| Parameter                     | Conditions/Description                                 |     |               |                           |  |  |

#### Note

- 1. Exist with model no. suffixed -E, the pin assignment of CN2 is Pin 1~2 for + V, Pin 3~4 for V; please also refer to the comparison in Model no. coding.
- 2.Exist with model no. suffixed -SB, please see the detail in Model no. coding.

### 200W Medical AC / DC

#### **Thermal Considerations**

In order to ensure safe operation of the PSU in the end-use equipment, the temperature of the components listed in the table below must not be exceeded.

Temperature should be monitored using J type thermocouples placed on the hottest part of the component (out of any direct air flow). See Mechanical Details for component locations.

| Temperature Measurements at max. amb. |                 |  |  |  |  |
|---------------------------------------|-----------------|--|--|--|--|
| Component                             | Max Temperature |  |  |  |  |
| T1                                    | 110℃            |  |  |  |  |
| Q1                                    | 120°C           |  |  |  |  |
| D5, D6                                | 120℃            |  |  |  |  |
| C7                                    | 105℃            |  |  |  |  |
| C21                                   | 105℃            |  |  |  |  |
